CHUKWUDUMEBI ORJI

dumebi.orji1@yahoo.com || +447721202197

Result-driven IT professional with experience in developing high-quality code for complex payment systems in a collaborative environment. Proficient in writing and debugging code, testing functionality, and creating technical documentation to ensure code quality and maintainability. Exhibited ability to collaborate effectively with cross-functional teams and participate in code review sessions with senior developers to deliver successful integration of payment systems.

Professional Experience

Digicore Ltd. - Lagos, Nigeria
Junior developer (October 2022 - present)
- Contributed code for the Omni-payment gateway that was successfully integrated into the codebase. Tasks included writing and debugging code, participating in code review sessions with senior developers, and testing code to ensure proper functionality.
- Collaborated with cross-functional teams, including product managers and designers, to ensure code was integrated and worked seamlessly across all devices.
- Reviewed code with the team, provided feedback and incorporated feedback to improve code quality and maintainability.
- Created technical documentation using Docsify, including user manuals, API documentation, and code comments, to ensure ease of use and understandability for future developers.

HNG Internship - Remote
Front-end Intern (October 2022 - December 2022)
- Selected to participate in the highly competitive HNG coding program organized by the Zuri team, emerging as a finalist among the best programmers.
- Successfully completed a 10-stage program that gradually increased in complexity, using React to design and implement the UI for the login, profile, and settings pages for the team project (an API that can accurately identify whether the user of a website is a prominent figure or not).
- Implemented functionality and endpoints for these pages and developed two more individual projects that resulted in promotion.

Appzone Group - Lagos, Nigeria
Intern (March 2022 - May 2022)

- Designed and developed a core banking application using the MVC pattern, utilizing the C# ASP.NET programming language, while demonstrating a strong understanding of object-oriented programming (OOP) principles.
- Participated in weekly meetings with senior developers to discuss progress, identify challenges, and propose solutions, taking minutes as they progressed.

Education

Aptech Learning, Lagos, Nigeria   **September 2020**
Advanced Diploma in Software Engineering

University of Portsmouth, Hampshire, England   **January 2024**
Bachelor of Science, Computing and Information Systems
